

Introduction:

ZK4000 is a stable and excellent fingerprint reader. The device can capture fingerprint image and upload to the PC by USB interface. It supports most of the Windows OS, including Window 2000, xp, vista and Windows 7. We provide developer with SDK. The developer can integrate the hardware into their own system. This product is widely used in social insurance, public security, time attendance, fingerprint encryption, embedded system and other fields of application.

Feature:

- High-performance, maintenance-free optical fingerprint sensor
- Readily accessible for any finger
- High quality industrial-class ABS plastic material with scratchproof texture surface treatment
- Removable weighted stand
- High speed USB interface
- LED indicates the status of the device
- Driver CD included
- Available SDK for secondary development

Specification:

Fingerprint sensor	ZK Optical Sensor
Resolution	500 DPI / 256 gray
Sensing Area	5×18 mm
Image Size	280×360 pixel
Interface	USB
Support O/S	Windows2000, XP and Vista, windows 7
Operating Temperature	0°-55°C / 32-131°F
Operating Humidity	20% - 80%
Color	Black
USB Cable	150 cm
Weight	0.20 kg
Dimension (W×H×D)	49×79.8×65.5 mm
